Profile

I enjoy programming in C and C++ and analyzing code for performance. Outside of coding, I like mountain hiking and snowboarding. I also value communicating with people and am looking for an interesting team to work with.

Education

Sep. 2024 – Present: **Moscow Institute of Physics and Technology (MIPT)**
Pursuing a B.S. in System Programming and Applied Mathematics.
(Expected graduation: 2028)

Some Projects

C++ **Compiler**
A custom compiler written in C++ with a frontend built using Flex and Bison.

C++ **Bitonic-Sort**
A parallel bitonic sorting algorithm utilizing OpenCL and local memory optimizations. Profiled with Intel VTune.

C++ **Containers**
Exception-safe implementations of STL and custom C++ containers.

C **Mandelbrot**
A high-performance Mandelbrot set renderer utilizing loop unrolling and SIMD instructions.

ASM **Printf**
An implementation of the standard printf function with manual stack frame and format specifiers management.

Skills

Languages:	C, C++, Assembly (x86-64), Bash
Tools:	Linux, Git, Make, CMake, Godbolt, GDB, Valgrind, Perf, Intel VTune
Libraries:	OpenCL, Flex, Bison
Spoken languages:	English (Technical reading), Russian (Native)
